Please pay full amount or deposit to secure your place. Booking and payment can be made online

The Workshop & Richard Hill

This workshop is an in depth look at the presentations given at the Milton Erickson Foundation Conference in San Diego and ACA/PACFA conference in Canberra.

Fundamentals about the brain and mind are integrated with many different theories and processes support the Winner/Loser World Theory (see his book).

Richard is skilled in the neuroscience of psychotherapy, Interpersonal Neurobiology, Lifestyle Medicine and the new field of Psychosocial Genomics pioneered by Richard's mentor, Ernest Rossi.

This workshop will steep you in the most recent thinking in psychotherapy and introduce some new techniques that have emerged from the new movement of being a 'brain-wise therapist'.

Richard is a member of the NeuroLeadership Institute, Creative Skills Training Council, the Global Association for Interpersonal Neurobiology Studies and the International Psychosocial Genomics Research Group.. He writes and speaks internationally, holds a BA in linguistics, Dip. Prof Couns and MA in Social Ecology.
